

129. (New) The film of claim 128 wherein both surfaces of the optical elements are curved.

130. (New) The film of claim 128 wherein both surfaces of the optical elements are substantially the same shape.

131. (New) The film of claim 128 wherein at least some of the optical elements intersect or interlock with other optical elements.

132. (New) The film of claim 128 wherein at least some of the optical elements are staggered with respect to other optical elements.

133. (New) The film of claim 128 wherein at least some of the optical elements randomly intersect or interlock with other optical elements.

134. (New) The film of claim 128 wherein at least some of the optical elements are randomly staggered with respect to other optical elements.

135. (New) The film of claim 128 wherein at least some of the optical elements vary in size, shape, placement, index of refraction, density, angle, depth, height, or type.
